

Dorset Freight Trains 2011

Following on from my spreadsheet of what has passed through Poole over the past two years with the dates and headcode's. Here's a complete class list of what locomotives / units and on track plant we had pass or visit Poole through out 2011. This list is presented in numerical and class order.

The Emu's that have visited Poole on test or special workings are listed here as well as "On Track Plant" (for reference only).

The On Track Plant is really a hit and miss and will be listed if I see them about the Poole area or if they are reported to me. A separate doc will be produced on how many times the same numbered loco, OTP or steam loco has visited over the year as well. This will be uploaded at the end of the following year.

Diesel Locomotives

Class 59/0

59002, 59004,

Class 59/1

Class 59/2

59201,
